The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 1 is rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

It is unclear how the glue layer can be removed if a gold contact layer has been deposited on the glue layer. It appears that steps are missing in the claim language.

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Yao – US 5,578,976.

Yao (Figs. 6B-6E and text in col. 5, line 41 to col. 41 to col. 6, line 13) discloses the claimed invention by fabricating a contact of a microswitch by depositing a glue layer 38 (polyimide layer) on a contact area, depositing a gold contact layer 22 on the glue layer, and removing the glue layer.

Goodman – US 2002/0005580 , Suzuki – US 2002/0027487 , and
Stark – US 2002/0185712 describe forming micro devices and switches.
